

HELLO WINTER

See how many reindeer and snowflakes
you can find.

Fun Facts -

- Snowflakes are formed from frozen vapor in the clouds, water droplets freeze around particles of dust or pollen. All snowflakes have 6 sides due to their hexagonal ice structure leading to unique patterns
- Reindeer's have lots of blood vessels in their noses which helps to keep their nose warm. Just like Reindeer's can have red noses, like Rudolph.

Have a go at drawing ...
