# Carbon Capture

## Worksheet 2a

### Capturing Carbon

1. Describe what is happening in the cups.

2. After a few seconds, hold each cup to your ear.

What do you hear, and why do you think this is happening?

3. After a while, no sound can be heard from the cups.

Why do you think this is?

4. Some of the cups might still have leftover bicarbonate of soda.

What could you do to cause more of a reaction?

Try it out to see if you're correct.
